

innowave® 360

High Quality Drinking Water

- Distilled water for drinking and cooking
- Helps to reduce water-related illness
- Produces up to 12 gallons per day

Variety of Applications

- Pumps water to multiple locations
- For home and business applications
- Dedicated drinking water for coffee makers, water coolers, ice makers and water faucets

Convenient to Use

- Automatically refills for a virtually unlimited supply of drinking water
- No heavy, 42 lb. bottles to lift, store or replace
- Reduces potential for Worker's Comp claims due to lifting accidents

Low Maintenance

- Durable, stainless steel shell
- Compact unit about the size of a window air conditioner
- Self-draining feature eliminates need for daily maintenance
- System serviced by your innowave Dealer

Specifications

Width: 22 in. (56 cm) **Depth:** 17 in. (43 cm) **Height:** 19 in. (48 cm)
Water Connection: 1/4" tubing
Weight: 56 lbs./25 kg (dry); 120 lbs./54 kg (wet)
Electrical Supply: 13 amps
Distilling Capacity: Up to 12 gallons (45 liters) per day
Distilled Water Supply: 1.4 gallons (5.3 liters) per minute from the demand pump
Storage Capacity: 5-1/2 gallons (21 liters)

Treatment Process

- 1 Distillation**
 - Water boils to kill bacteria, viruses and parasites
 - Steam is cooled by a fan and condenses into fresh water
 - Substances that cannot evaporate remain in the boiling chamber and are drained away
- 2 Carbon Filtration**
 - Traps contaminants
 - Improves taste and odor
 - Reduces chlorine and organic contaminants

02-1450

innowave® 360

Distillation-Based Technology

The innowave® 360 drinking water system takes ordinary tap water to an extraordinary new level of clean. This compact unit combines distillation, the most effective method for reducing virtually all contaminants, with carbon filtration to produce high quality drinking water. You can rest assured that water which has been distilled and carbon filtered will exceed all US EPA National Drinking Water Standards.

Made Nature's Way

The innowave® 360 uses distillation to treat water, which is similar to nature's hydrological process of heating, evaporation, and condensation. The innowave® 360 does not use chemicals, such as chlorine, to produce high quality drinking water. The distilled water from the innowave® 360 is carbon filtered to reduce volatile organic contaminants. Carbon filtration when added to distillation makes water from the innowave® 360 some of the best-tasting water you can drink.

Quality Drinking Water

Today, many employers and families are choosing to take personal control of the quality of their drinking water to reduce health risks. Distillation is a highly effective means of reducing microbiological contaminants, which may cause gastrointestinal illness. By combining water treatment technologies, the innowave® 360 also significantly reduces organic, inorganic and radioactive contaminants and improves the taste and odor of ordinary tap water.

Ideal for Office or Home

The innowave® 360 pumps high quality water wherever you want it, whether it be a dedicated faucet, water cooler, coffee machine, sink or ice maker. Water is treated at the point-of-use and pumped directly where you need it, eliminating the risk of recontamination. You'll instantly notice the difference in water from an innowave® system. Enjoy crystal clear ice, great-tasting coffee and refreshing drinking water.

No Bottled Water Hassles

Never again will you need to be concerned with storing, lifting or receiving deliveries of heavy 5-gallon drinking water bottles. The innowave® 360 system connects directly into the existing tap water supply and treats water right in your office or home. This assures a virtually unlimited supply of fresh, great-tasting water 24 hours a day.

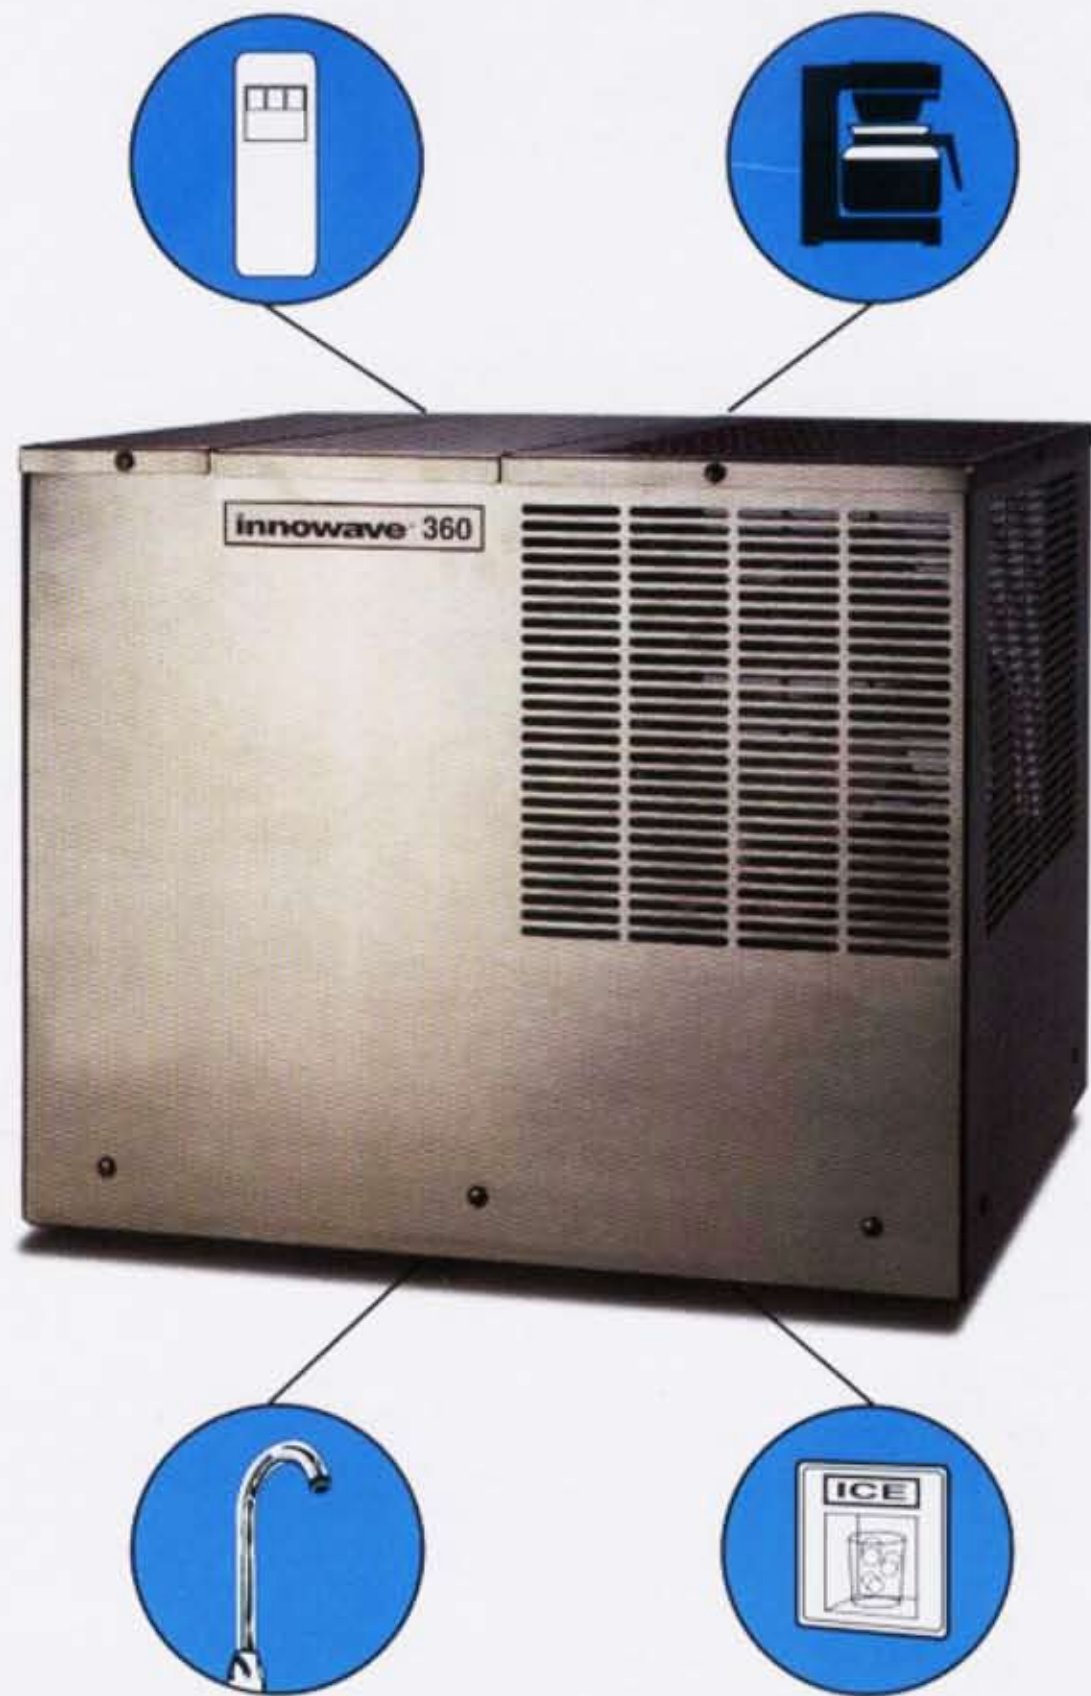

A Mutual of Omaha Subsidiary

innowave incorporated is a Mutual of Omaha Subsidiary, an organization with a distinguished history of commitment to wildlife and conservation. As a provider of products and services that impact the wellness of society, together we recognize the important role of safe drinking water in maintaining good health.

The innowave® 360 is Tested and Certified by NSF International against ANSI/NSF Standard 62 Drinking Water Distillation Systems for the following reduction claims:

- | | | | |
|--|------------|--------------------------------|------------|
